

These trailers are self bunded to provide a range of mobile tanks ideal for smaller volume storage, transport and dispensing.

The trailer range is designed and approved for use both on road (registered) and off road applications. The trailer has been independently certified and complies to Australian design rules.

All trailers incorporate;

- Roll over coaming
- Removable manhole
- Pressure/vacuum vent
- Emergency release vent
- Calibrated dip stick
- Baffled tank
- Front Access Platform
- Heavy duty steel channel chassis fully galvanised with low centre of gravity to ensure the correct balance when being towed.
- Robust dual axle assembly, complete with 15" offroad wheels, wheel nut indicators and spare.
- Large lockable pump storage cabinet with gas strut assembly.
- 3500kg electric brake system with breakaway system and LED indicators.
- LED lighting system.
- Specifications:
3978mm long
1990mm wide
1254mm high
1500kg tare weight
Safe fill level -1500 litres.

Accessories:

- Pumping systems to suit flow rates required including solar powered systems.
- Electric Brake Controller.
- Registration for on road use.
